Raj Kumar Verma

Full-Stack Developer (MERN)

+91 7970908458 | rajvermause@gmail.com | LinkedIn | GitHub | Giridih, Jharkhand, India

Summary

Full-Stack (MERN) Developer building secure, scalable applications with AI integration. Developed 3 production-grade projects featuring JWT authentication, REST APIs, and double-entry ledger systems. Seeking a full-stack or SDE role to contribute clean, maintainable code within a collaborative engineering team.

Education

University Institute of Technology, Burdwan University **Expected Graduation: Aug 2027**
B.E. in Computer Science & Engineering *West Bengal, India*
– **Relevant Coursework:** Data Structures & Algorithms, OOP, DBMS, Operating Systems, Computer Networks, Software Engineering

Technical Skills

Languages	JavaScript (ES6+), Java, Python, C, C++
Frontend	React.js, React Router, Tailwind CSS, Bootstrap, jQuery, HTML5, CSS3, Axios, EJS
Backend	Node.js, Express.js, REST APIs, JWT, bcrypt, OAuth
Databases & ORM	MongoDB, Mongoose, MySQL, Prisma
Tools & DevOps	Git, GitHub, Postman, Nodemon, dotenv, Cloudinary, AWS (Basics), Render
CS Fundamentals	DSA, OOP, OS, Computer Networking, Software Engineering

Experience

Full-Stack Development Intern **Apr 2026 to May 2026**
Vaidsys Technologies
– Implemented RBAC for 15+ protected routes, enabling 50+ concurrent users to manage 1,000+ content pieces safely.
– Built a draft-to-publish workflow, reducing publication time from 30 minutes to under 2 minutes.
– Developed a rich text editor with media uploads and scheduling, eliminating manual backend tasks.
– Designed an analytics dashboard with search and filtering, improving content discoverability by 40%.

Projects

AI Resume & Job Fit Analyzer Github Link
– **Tech:** React, Node.js, Express.js, Groq AI API, JWT, REST API, Axios
– Built an AI platform generating precise match scores and identifying skill gaps between resumes and job descriptions.
– Engineered a multi-source pipeline to cross-analyze candidate profiles for technical and domain competencies.
– Implemented a dynamic interview module producing role-specific question banks to target identified weaknesses.
– Designed a roadmap engine generating personalized 7-day study plans aligned with target job requirements.

StayGenie - Real Estate Platform Github Link
– **Tech:** React.js, Node.js, Bootstrap, EJS, JWT, MVC Architecture
– Developed a full-stack Airbnb clone with complete CRUD, user authentication, and reviews using MVC principles.
– Secured 10+ protected property routes by implementing JWT authentication and strict ownership authorization.
– Integrated an interactive map API to enable real-time location rendering, dynamic search, and filtering.
– Deployed on Render featuring secure image uploads, bcrypt password hashing, and robust error handling.

BankCore API Github Link
– **Tech:** Node.js, Express.js, JWT, bcrypt, REST API, MVC
– Architected a banking backend enabling multi-account management, secure transfers, and transaction history tracking.
– Implemented a double-entry ledger system ensuring atomic transactions and maintaining a complete financial audit trail.
– Engineered layered middleware guards with JWT authentication to secure highly sensitive financial API routes.
– Designed transaction flows using fintech-grade principles to ensure data consistency and ledger integrity.

Achievements

- Shipped 3 production-grade full-stack applications (AI tools, fintech, real estate) secured with JWT and bcrypt.
- Integrated Groq AI API for automated resume matching, skill gap detection, and study plan generation.
- Maintained active GitHub repositories with structured commits, detailed READMEs, and modular MVC architectures.
